

Save heating costs in winter

1 °C lower room temperature
= 6 % lower heating costs.

>> REDUCE TEMPERATURE

Setting thermostats at night to 17 – 19 °C (level 2) saves up to 10 % heating costs

>> DON'T OBSTRUCT RADIATORS

Furniture and curtains in front of radiators increase heating costs by up to 12 %

How warm should I heat my home?

Thermostat level

>> PROPER VENTILATION

3 good reasons for ventilating your rooms:

- avoids build up of mould
- removes harmful substances
- breathing fresh air helps keep you healthy

How do I stop the buildup of mould?

- Don't tilt windows – the walls then cool down and little fresh air comes in

- Always ventilate after cooking and showering
- Don't position furniture against external walls
- Seal leaky windows and doors

>> SEAL DOORS AND WINDOWS
